

Splicer IX

Spare parts and accessories

DESCRIPTION AND FEATURES

Set of 5 high quality AISI 316 stainless steel needles, a material that gives maximum resistance to corrosion and weather.

USE

Nautical: suitable as splicing kit for braided and double braided ropes. The availability of 5 needles with different lengths is essential to be able to guarantee a quality result on any rope diameter. These needles are ideal for those looking for a high-quality set for their splicing needs, combining practicality with robustness and making it easier and more efficient.
