

MetaLux

Spare parts and accessories

DESCRIPTION AND FEATURES

High quality brass terminal, a material that guarantees a long life, high resistance to corrosion and weather.

It is available with a polished and chrome finish, at the end it is equipped with a flat bottom or a round ring and a carabiner to combine aesthetics and functionality in every area of application.

USE

Decoration: suitable for fastening the ends of twisted, braided and double braided ropes in synthetic and natural fibres.

The pieces of rope equipped with these particular accessories can be used to delimit areas within ticket offices, warehouses, shops, museums, exhibitions, exhibitions and fairs, satisfying multiple functional and aesthetic needs.

NOTES

Other versions available on request.
