

# IgniRope

## Twisted ropes

### DESCRIPTION AND FEATURES

3 strands high tenacity spun polyester twisted rope, a synthetic fibre that gives softness to the touch, excellent resistance to breakage and weather with moderate elongation. Its structure makes it easy to splice and keeps it soft and easy to handle even after use. This sinking rope is equipped with a special treatment that allows it to significantly reduce the ability to ignite and spread fire in the event of direct contact with it.

### USE

Theatrical uses: suitable for the creation of sets and lifting of wings, skies and backdrops thanks to its adherence and silence in the sliding phase on pulleys, decidedly superior to the classic flax (HempStyle) and hemp ropes.  
 Decoration: suitable for creating environments, coverings, window dressing and delimitation of areas.  
 Nautical: suitable for on-board equipment, decking and deck fittings.

### NOTES

Other colours, diameters and packagings available on request.
